The application should be reviewed for errors. Error, occurs, for example in the recitation of "composition" at claim 10, line 11.

Also, to clarify the invention, it is recommended that further indentation be used at least in claim 10.

The amendment filed 12/22/03 is acknowledged. Claims 2-8 and 10-15 are being considered on the merits.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-8 and 10-15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are directed to a process requiring nuclease or alkali hydrolysis to obtain polyamines under certain process conditions and in some claims in an amount 2-3.2 times the amount of polyamines obtained in the absence of this hydrolysis step at certain process conditions.

Applicant indicates that support for the conditions now claim designated is found in the Examples, but there is no indication regarding the location of the support for this material. Clear basis or support is not found for the material now claimed. Applicant is invited to indicate the specific locations in the specification relied upon for the claim limitations now recited.

Please see *Gentry Gallery v. Berkline* 45 U.S.P.Q.2d 1498 for a discussion related to broadening the claimed invention without support in the as-filed specification. Please see *PurduePharma v. Faulding* 56 U.S.P.Q.2d 1481 for a discussion related to a failure to describe a claimed generic concept in the narrative portion of the specification, but rather basing support on limitations in examples.

Therefore, the claims as written raise the issue of new matter.

Art Unit: 1651

Applicant's arguments that sodium hydrate is an alkali are persuasive.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-8 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 remains and claim is vague and indefinite in the recitation of "subjecting said yeast somatic components to a decomposition step comprising nuclease digestion or alkali hydrolysis of increasing the yield". Do applicants mean "for increasing...". The phrase as written appears incomplete or grammatically incorrect.

Claim 13 is confusing in the recitation of "dissociate substantially all of polyamines included in the yeast somatic components". The extent of dissociation intended cannot be readily determined.

### ***Response to Arguments***

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

Applicant addressed this rejection only to the extent of the comment by the examiner that a clause seemed to be omitted. As noted *supra*, the phrase as written appears incorrect or incomplete and should be corrected.

Therefore the rejection is deemed proper and it is adhered to.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
